

LOVELY MAE CHAVEZ

Software Engineer I | Backend Developer

Binangonan, Rizal, Philippines

chavezlovelym@gmail.com

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 2+ years of experience building enterprise systems, workflow automation, and payroll computation logic. Skilled in Django, REST APIs, and cloud deployment on Azure. Experienced in integrating third-party systems (Microsoft Graph API, SharePoint) and supporting full software development lifecycle including testing, deployment, and UAT.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C#, HTML, CSS

Frameworks: Django, Django REST Framework, React, Vite, Tailwind CSS

Automation & Microsoft Technologies: Power Automate, SharePoint, Microsoft Graph API, Azure AD, Microsoft Teams App Development & Deployment

APIs & Integrations: REST APIs, WebSockets

Databases: PostgreSQL, MySQL, SQLite

Cloud & DevOps: Azure App Service, Azure VM, Git, SSL Configuration

Testing: Unit Testing, Integration Testing, Functional Testing

Concepts: Agile Development, System Design, RBAC, Workflow Automation

PROFESSIONAL EXPERIENCE

Software Engineer I

Microgenesis Business Systems | Nov 2025 – Present

- Maintained and enhanced enterprise systems including payroll and task management platforms
- Designed and implemented REST APIs and integrated third-party services
- Developed rule-based payroll engine (overtime, holidays, rest day, night differential)
- Deployed and managed applications on Azure (App Service, VM, SSL)
- Conducted unit, integration, and functional testing; supported UAT
- Participated in code reviews and ensured high-quality, maintainable code
- Built Power Automate cloud flows for automated email notifications, approval routing, SharePoint integration, and workflow process automation

Backend Developer

Microgenesis Business Systems | Aug 2024 – Nov 2025

- Designed and developed scalable backend systems aligned with business requirements
- Collaborated with stakeholders and business analysts for system specifications
- Built APIs and integrated enterprise systems with external platforms

- Developed AI chatbot and document management systems
 - Performed debugging, maintenance, and testing of applications
-

PROJECTS

CHRONOS – Time Tracking & Payroll System (2025)

- Built enterprise workforce system with task tracking, timesheet workflows, approval processes, and payroll computation engine
- Implemented rule-based payroll logic including overtime, holidays, rest day, and night differential calculations
- Developed real-time notifications using WebSockets (Django Channels)
- Designed and exposed REST APIs for workflow and payroll modules
- Integrated system with Microsoft Teams by deploying a **custom Teams application for internal workforce access**
- Deployed and maintained backend services on Azure (App Service, VM, SSL configuration)
- Ensured system reliability through unit, integration, and functional testing

RDMS – Research Document Management System (2024)

- Developed document lifecycle system with role-based access control (RBAC)
- Integrated Microsoft Graph API and SharePoint for document storage
- Implemented OTP authentication, activity logging, and real-time updates

DIGIBOT – AI Chatbot System (2024)

- Built chatbot using Python and Azure OpenAI for automated user support
- Designed context-aware responses to improve workflow efficiency

Doce-Amor Wellness Spa Website (2026)

- Developed responsive frontend with React, Vite, and Tailwind CSS
- Focused on clean UX/UI and mobile-first design

ALAME – Batangueño Dialect Learning & Contribution Platform (2024)

- Developed a Django-based web application for preserving and learning Batangueño dialect words
- Built visitor and admin modules for word contribution, validation, approval, rejection, and word bank management
- Integrated NLP features for chatbot interaction, word lookup, similarity matching, and correction suggestions
- Implemented an AI chatbot named AI-E using OpenAI API and local NLP assets for Batangueño word assistance
- Designed a reward points system to encourage users to contribute valid Batangueño words
- Added feedback, analytics, pending contribution tracking, and admin review workflows

Google Sheets API Integration & Automation System (2023)

- Developed C# and MySQL-based automation tools integrated with Google Sheets API and Google Drive API during internship at Sorosoro Ibaba Development Cooperative (SIDC)
 - Built automated spreadsheet generation, report creation, and database-to-spreadsheet synchronization features
 - Implemented CRUD operations, real-time data handling, dynamic spreadsheet formatting, and branch-based report generation
 - Added file existence validation, duplicate checking, deletion handling, and automated data export functionalities
 - Worked on debugging, exception handling, and optimization of data processing workflows
 - Assisted in QA testing, business analysis support, and Data Flow Diagram (DFD) documentation creation
-

EDUCATION

Bachelor of Science in Computer Science
University of Batangas | 2020 – 2024

CERTIFICATIONS

Microsoft Certified: Power Platform Developer Associate (2025)
AWS Academy Graduate – Cloud Foundations (2024)
Cisco Introduction to Cybersecurity (2023)

ACHIEVEMENTS

Cum Laude | Dean's Lister | Best in C++ Project
