LOVELY MAE CHAVEZ

Software Engineer

Binangonan, Rizal, Philippines | chavezlovelym@gmail.com | 09063483789

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 2+ years of experience developing Django and React applications, REST APIs, workflow automation, and Azure-hosted systems. Built backend systems using PostgreSQL and integrated applications with Microsoft 365 services through Microsoft Entra ID, Microsoft Graph, SharePoint, and Power Automate. Experienced in translating business requirements into secure APIs, data models, automated workflows, tests, and production deployments.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, HTML, CSS
Backend: Django, Django REST Framework, REST APIs, WebSockets, Django Channels
Frontend: React, Vite, Tailwind CSS
Databases: PostgreSQL, MySQL, SQLite
Cloud and Integrations: Microsoft Azure, Azure App Service, Azure VM, Azure DevOps, Microsoft Graph, SharePoint, Power Automate, Google APIs
Security and Engineering: JWT, OTP, RBAC, audit logging, Git, system design, automated testing, UAT

PROFESSIONAL EXPERIENCE

Software Engineer I | *Microgenesis Business Systems | Nov 2025 – Present*

- Develop and enhance enterprise web applications using Django, React, TypeScript, REST APIs, and Microsoft Azure.
- Design backend services, database structures, API contracts, role-based workflows, and integrations based on business and system requirements.
- Deploy and manage applications across Azure App Service and Azure VM environments, including environment configuration and SSL setup.
- Build Power Automate cloud flows for email notifications, approval routing, SharePoint integration, and business-process automation.
- Use AI-assisted development tools to accelerate coding, debugging, test creation, requirements analysis, code review, and technical documentation while validating outputs against project requirements and engineering standards.
- Perform code reviews, debugging, testing, UAT support, and production issue resolution while improving maintainability and reliability.

Backend Developer | *Microgenesis Business Systems | Aug 2024 – Nov 2025*

- Designed and developed scalable backend applications and REST APIs aligned with business requirements.
- Collaborated with stakeholders and business analysts to translate functional requirements into technical implementations.
- Integrated enterprise systems with Microsoft services and other external platforms.
- Developed AI chatbot and document-management solutions and performed application testing, maintenance, and troubleshooting.

PROJECTS

College Entrance Examination Platform (Current) | *Python • Django • DRF • React • TypeScript • PostgreSQL • Azure*

- Contribute to a national-scale platform for student registration, admissions review, examination operations, and administrative workflows.
- Develop registration and profile-completion flows with student-reference identity checks, bulk-uploaded reference data, selfie requirements, account setup, and configurable fields.
- Implement email and OTP verification, JWT access and refresh sessions, password recovery, RBAC, audit logging, and related security controls.
- Design REST endpoints and PostgreSQL models for verification, application review, reference data, and administrative workflows.
- Build CSV import workflows with validation, duplicate and conflict detection, idempotent processing, batch tracking, source metadata, and audit events.

Time Tracking & Payroll System (2025) | *Django • REST APIs • WebSockets • Azure AD • Azure*

- Built task tracking, timesheet, approval, and payroll workflows, including rule-based calculations for overtime, holidays, rest days, and night differential.
- Added real-time notifications with Django Channels, single sign-on through Microsoft Entra ID, a Microsoft Teams application, and Azure deployment.

Research Document Management System (2024) | *Django • Microsoft Graph • SharePoint • Azure*

- Developed a document lifecycle system with RBAC, OTP authentication, activity logging, and real-time updates.
- Integrated Microsoft Graph API and SharePoint for document storage and deployed the system on Azure VM.

AI Chatbot System (2024) | *Python • Azure OpenAI*

- Built a context-aware AI chatbot for automated user support and workflow assistance.

Doce-Amor Wellness Spa Website (2026) | *React • TypeScript • Vite • Tailwind CSS*
- Developed responsive, mobile-first interfaces with a focus on clean UX/UI.

ALAME – Batangueño Dialect Learning & Contribution Platform (2024) | *Django • NLP • OpenAI API*
- Built contribution, validation, approval, word-bank, feedback, analytics, and reward-point workflows.
- Integrated NLP-assisted lookup, similarity matching, correction suggestions, and an AI chatbot for dialect assistance.

Google Sheets API Integration & Automation System (2023) | *C# • MySQL • Google APIs*
- Built automation tools for spreadsheet/report generation and database-to-spreadsheet synchronization during internship at SIDC.
- Implemented CRUD operations, duplicate/file validation, dynamic formatting, data exports, exception handling, and QA support.

EDUCATION

Bachelor of Science in Computer Science | University of Batangas | 2020 – 2024

CERTIFICATIONS & ACHIEVEMENTS

Microsoft Certified: Power Platform Developer Associate (2025) | AWS Academy Graduate – Cloud Foundations (2024) | Cisco Introduction to Cybersecurity (2023)
Cum Laude | Dean's Lister | Best in C++ Project
